

Humidifier Limpia 4

Olimpia Splendid Limpia 4

Art: 99424

High-efficiency humidifier with double rotating nozzles that emits finely divided moisture in the room.

- Cold moisture via ultrasonic technology
- Humidification capacity 300 ml / h
- Remote control
- Coloured LED light for colour therapy
- Stepless steam intensity
- Tank capacity 4 litres
- Hours, 8, 4 or 2 hours

With its unique ultrasonic technology, the water particles are atomized in a way that allows the moisture to spread evenly in the room. Another advantage is that the technology minimizes the risk of water ending up on the floor or table around the humidifier. However, you should continue to be careful if you place it directly on a wooden surface, parquet floor or similar. Limpia 4 has a stepless adjustment for how much water vapor you want to discharge.

Limpia 4 has a high capacity with about 3 dl water / hour, which with a full tank means that it can be run at maximum power for over 12 hours. With a normal ceiling height, it can be recommended for a living area of about 35 m². Please note that this is only a recommendation and depends entirely on how your rooms are ventilated and what humidity you have outdoors.

**ALBION
NORDIC**

Limpia 4 is economical as it only has a power consumption of max 25W and it has a timer that can be set in three modes, 2, 4 or 8 hours.

With the supplied remote control, you can switch the device on / off and set the timer. You can also control the built-in lighting. The lighting means that the water tank is illuminated and changes colour scheme automatically, in a relaxing way. With the remote control, you can "freeze" the lighting on the colour you like best or let the colour vary automatically. You can also turn off the lighting completely.

Technical data:

PRODUCT CODE	99424
EAN	8021183994247
Humidification capacity ml / h	300
Humidity area sqm	35
Power consumption W	25
Steam adjustment	Stepless
Protection level	IP X0
Tank capacity litres	4.0
Product dimensions (W x H x D) mm	204 x 290 x 205
Packaging Dimensions (W x H x D) mm	245 x 340 x 235
Weight (without packaging) kg	1.20
Weight (with packaging) kg	1.80
Power supply V-F-Hz	220-240 - 1 - 50
Compliance mark	CE
Ultrasonic technology cold fog	√
Remote control	√
Tank empty signal	√
Setting the steam level	√
Night light	√
Adjustable steam nozzle	√
Timer	√
